

When the parameter values of the elements become incorrect by changing the parameter values of the overlay specifications, a warning message is displayed. You can adjust parameter values of those elements by pressing the Enter key, or you can change the parameter values of the overlay specifications to correct the errors.

The following table describes the cause of warning messages and the results.

Table 6. The Cause of a Message and Its Results

Cause	Result
The <i>Unit of measure</i> changed from 1=Inch to 2=Centimeter and the value for <i>Module width</i> gets too small. For example, 0.001 inches becomes 0.001 centimeters.	The correct minimum value 0.003 centimeter is used.
The <i>Unit of measure</i> changed from 2=Centimeter to 1=Inch and the value for <i>Module width</i> or <i>Line width</i> gets too large. For example, 2 centimeters becomes 2 inches.	The correct maximum value 1 inch is used.
The <i>Printer type</i> changed from 1=4224/4234/4230 or 9=Not specified to another type and the value for <i>Color</i> becomes incorrect. For example, 1=Blue is incorrect.	The value *DEFAULT is used.
The <i>Printer type</i> changed from another type to 1=4224/4234/4230 , or 2=3812/3816/3930, or 3=3916/4028 , or 7=3935 and the value for <i>Format</i> becomes incorrect. For example, 2=Vertical is incorrect.	The value 1=Horizontal is used.
The <i>Printer type</i> changed from 1=4224/4234/4230 , or 2=3812/3816 , or 3=3916/4028, or 7=3935 , or 9=Not specified to another type and the value for <i>Overstrike</i> becomes incorrect. For example, X is incorrect.	Blank is used.
The <i>Printer type</i> changed from 1=4224/4234/4230 , or 2=3812/3816/3930 , or 3=3916/4028 , or 7=3935 , or 9=Not specified to another type and the value for <i>Underline</i> becomes incorrect. For example, Y is not correct.	The value N is used.
The <i>Printer type</i> changed from 1=4224/4234/4230 , or 2=3812/3816/3930 , or 3=3916/4028 , or 7=3935 , or 9=Not specified to another type and the value for <i>Character size</i> becomes incorrect. For example, 1 is not correct.	The value *DEFAULT is used.
