

- a. Engagement of IT experts corresponding to the relevant IT profiles listed in Annex 11 of the Technical Specifications and amounting to minimum 2000 person-days.
 - b. The work related to each referenced contract must have been performed during a continued period of minimum 6 months, during the timeframe from 23/11/2016 to **08/01/2021** and must have resulted in a major release deployed to production.
 - c. Minimum 2 referenced contracts must have been performed in DevOps mode.
 - d. Minimum 2 referenced contract must have been performed with applied cheminformatics techniques for chemical searching and clustering with tailor-made, complex visualisation such as graphs comprising several thousand nodes and edges.
 - e. Minimum 1 referenced contract must have been performed after/upon takeover of a production grade information system from a third party(ies) and resulting in a seamless transitioning of development activities.
- 4. Minimum volumes for each referenced contract for Information systems takeover:**
- a. Engagement of IT experts corresponding to the relevant IT profiles listed in Annex 11 of the Technical Specifications.
 - b. The work related to each referenced contract must have been performed during a continued period of maximum 6 months, during the timeframe from 23/11/2016 to **08/01/2021** and must have resulted in the full takeover of a production grade information systems from a third party(ies).
 - c. Systems with over 500 registered users¹⁸;
- 5. Minimum volumes for referenced contract for Information systems operations:**
- a. Each referenced contract must have the engagement of IT experts corresponding to the relevant IT profiles listed in Annex 11 of the Technical Specifications and amounting to minimum 2000 man-days.
 - b. The work related to referenced contract must have been performed during a continued period of minimum 2 years, during the timeframe from **23/11/2016 to 08/01/2021**.
 - c. Minimum 2 referenced contracts must have been performed in DevOps mode.

¹⁸ Registered user relates to a user having access to the system, implemented in frame of the referenced contract, where the user was identified with a unique identifier and a password, e.g. employees using the developed system, freelancers working for an institution and using the system as uniquely identified person, extranet users, etc. Registered user is not someone using the system, e.g. someone browsing a website or a guest in an online shop cannot be understood in the contract reference as a valid user fulfilling this requirement.
