

Option	Description
Accessibility Mode	Turning on the Accessibility mode enables the accessibility features if you use only the keyboard to interact with BI Publisher. When Accessibility Mode is enabled, • The tables on the user interface pages display options to enable multi-row selection and subsequent action. • The assistive technology provides access to menus. • <i>Skip to content</i> is enabled. When tabbing into the main page of the application, the first item you tab to is a special field that states <i>Skip to content</i>. When you press the Enter key with focus on an item, the focus skips over the header links to the main body of the page. For example, if you are on the Home page and you tab to <i>Skip to content</i>, and then press Enter, the cursor advances to the Create region with the focus on Report. The focus skips over Search, Help, Sign Out, and other links in the global header. • The create report process flow limits the options to make the selection of a data model as the first step in the process. • The Administration link is not displayed.
Email Addresses	This field is reserved for future use and is not functional in this release.

Changing Your Password

Use the Password tab to change your password.

If your account password settings are inherited from another application, then you cannot update your password here.

To change your password:

1. Navigate to the My Account dialog from the global header.
2. Click the **Password** to change your password.

About the Home Page

The Home page provides an intuitive, task-based window for the BI Publisher functions.

The Home page consists of the following sections:

- [Create](#)
- [Jobs or Browse/Manage](#)
- [Download BI Publisher Desktop Tools](#)
